

Company Update

David Sawcer, MD PhD Joins Aesthetic Medical Devices

David will serve as medical advisor to the company

Los Angeles CA, April 17, 2013: AESTHETIC MEDICAL DEVICES announced today that Dr. David Sawcer joined the company as medical advisor. Dr. Sawcer's primary responsibility will be to serve as medical advisor for the lead facial toning device system and to lead collaborative efforts on commercial development of a nanoparticle delivery system.

Dr. Sawcer is an assistant professor of clinical dermatology in the Keck School of Medicine at USC, and director of clinical and translational research. Educated in England, he received his medical degree from the University of Birmingham and completed his internal medicine training at Oxford University. Later he undertook specialty training in dermatology with a residency at the prestigious St John's Institute of Dermatology in London. Prior to his M.D., Sawcer completed Ph.D. research in physics at the University of Southern California, specializing in lasers.

About AESTHETIC MEDICAL DEVICES LLC

AESTHETIC MEDICAL DEVICES is a medical device company specialized in the development and commercialization of products, devices and systems that are based on microcurrent and iontophoresis technologies. The Company's lead product candidate is SkinTechMD, a next generation home-use facial toning system to reduce fine lines and wrinkles.
